

ENTERTAINING

KEEP IT LIGHT

CorningWare® SimplyLite® bakeware makes it easier than ever to entertain at home. It's half the weight of traditional ceramic bakeware* and can go straight from your oven or microwave to the dinner table. Here's how to throw an instant dinner party with CorningWare SimplyLite bakeware:

Easier than flowers: Make a vibrant centerpiece by filling a large glass vase with lemons and limes.

Bonus: You'll know where to find drink garnishes when you need them!

One special dish: Wow your guests with one unusual dish that looks as beautiful as it tastes, such as coq au vin.

From oven to table: Serve side dishes that spend most of the time in the oven—you can focus on other things while they cook—and can go straight to the table once they're done, like a vegetable medley.

A simpler salad: Create a colorful crudité's platter, with sliced vegetables and hummus, to serve as an appetizer and do away with messy dressings and salad plates.

*On average versus the leading ceramic bakeware brand.
